Re: Revised Schedule I
Docket No. 2018-_____-E

Dear Ms. Boyd:

Lockhart Power Company ("LPC") hereby submits for approval a Revised Schedule I, Industrial Service. This letter is accompanied by the following attachments:

1. Attachment A – The Revised Schedule I, showing changes; and
2. Attachment B – Revised Schedule I.

The purpose of the Revised Schedule I, tariff is to provide for LPC's customers that have the characteristics of large industrial loads but are newer technologies that are not classified as "Manufacturing Industries" by the Standard Industrial Classification Manual, 1957 or later revision. By deleting the first two sentences of the current Schedule I, it will allow companies not classified as "Manufacturing Industries" by the Standard Industrial Classification Manual with loads that would otherwise qualify for such rates utilize such rates if they consider the Schedule I rates more advantageous to them.

This tariff revision capitalizes on Lockhart Power's ability to serve large electric loads without increasing costs for existing customers. Existing customers benefit because the increase in large customer diversity will mitigate the system impact of any single large customer leaving in the future.

Lockhart Power Company requests that this submission be processed pursuant to Section 58-27-870 (F) as the proposed revision to Schedule I does not result in any rate increase to the customers or to the LPC and is for the purpose of obtaining orderly rate administration and therefore may be put into effect without notice and hearing. Therefore it is requested that the Commission process Schedule I without notice and hearing pursuant to Section 58-27-870 (F).

LPC respectfully requests Commission approval of the revised Schedule I, at the Commission's earliest convenience. Upon approval by the Commission, LPC will complete its implementation plans and make the programs available to customers as soon as reasonably possible.

Please let me know if you have any questions.

Very truly yours,

McNAIR LAW FIRM, P.A.

LOCKHART POWER COMPANY
SCHEDULE I
INDUSTRIAL SERVICE

AVAILABILITY

~~Available only to establishments classified as "Manufacturing Industries" by the Standard Industrial Classification Manual, 1957 or later revision, published by The Bureau of Budget, United States Government, and only where 85% or more of the total energy consumption of such establishment is used for its manufacturing processes.~~

Service under this Schedule shall be available only to customers with a metered demand of 500 kilowatts or more served from the Company's transmission system, or customers served under this Schedule prior to the effective date of this Schedule.

Service under this Schedule shall be used solely by the contracting Customer in a single enterprise, located entirely on a single, contiguous premises.

This Schedule is not available for auxiliary, breakdown or standby service; and power delivered hereunder shall not be used for resale or exchange or in parallel with other electric power, or as a substitute for power contracted for or which may be contracted for, under any other schedule of the Power Company, except at the option of the Company, under special terms and conditions expressed in writing in the contract with the Customer.

The obligations of the Company in regard to supplying power are dependent upon its securing and retaining all necessary rights-of-ways, privileges, franchises and permits, for the delivery of such power, and the Company shall not be liable to any Customer or Applicant for power in the event it is delayed in, or is prevented from furnishing the power by its failure to secure and retain such rights-of-ways, rights, privileges, franchises and permits.

TYPE OF SERVICE

The Company will furnish 60 cycle service through one meter, at one delivery point, at one of the following approximate voltages, where available:

- Single phase, 120/240 volts; or
- 3 phase, 208Y/120 volts, 460Y/265 volts; or
- 3 phase, 3 wire, 240, 460, 575, or 2300 volts; or
- 3 phase, 4160Y/2400, 12470Y/7200 volts; or

3 phase voltages other than the foregoing, but only at the Company's option, and provided that the size of the Customer's contract warrants a substation solely to serve that Customer, and further provided that the Customer furnish suitable outdoor space on the premises to accommodate a ground-type transformer installation, or substation, or a transformer vault built in accordance with the Company's specifications.

The type of service supplied will depend upon the voltage available. Prospective Customers should ascertain the available voltage by inquiry at the office of the Company before purchasing equipment.

Motors of less than 5 h.p. may be single-phase. All motors of more than 5 h.p. must be equipped with starting compensators and all motors of more than 25 h.p. must be of the slip ring type except that the Company reserves the right, when in its opinion the installation would not be detrimental to the service of the Company, to permit other types of motors.

(Schedule I continued)
